Agency response

I will reiterate in part our response from last year that any disparity in numbers are attributable in large measure to state highways running through our community, i.e., highways 141 and 100. In fact, the data indicate that just under 50% of all traffic stops were on the state highways. Black motorists made up 58% of all traffic stops on state highways. Incidentally, with the completion of 141 running through Manchester, the number of vehicles traveling the highway may be approximately 150,000, up from 50,000 from last year. Only four of 187 black motorists cited, or 2%, were residents of the city of Manchester.

Agency response

The 20,840 population used in this report does not reflect the true demographics of the city of Maryland Heights. Maryland Heights has 1,813 businesses, which employ 52,233 people. The city contains Harrah's Casino, which had six million visitors in 2001. The 20,000-seat Riverport Amphitheater had 398,000 visitors in 2001. The city has 20 hotels with 3,249 rooms. Maryland Heights has 61 liquor establishments selling alcohol by the drink. Finally, the section of I-270 in Maryland Heights has an average daily traffic count of 178,000 vehicles, the third highest in the state. The demographics of the 6,497,000 vehicles on I-270, the six million visitors to the casino, 398,000 visitors to Riverport and the 52,233 people employed in Maryland Heights are not known but surely impact this report.

Agency response

This department still maintains that the system whereby arrests, stops and searches are compared to the permanent population is fundamentally flawed. We experience a significant number of transient individuals who have no permanent residence in Mexico or live in other areas who are involved in incidents here. We understand that some steps have been taken to correct these inaccuracies in the future, but we note that these corrections are not reflected in this year's figures.

Agency response

We have a state penitentiary that opened in our county in October 2001. Interstate 57 runs the full length of our county connecting major cities such as Chicago to Tulsa and Chicago to Memphis.

Agency response

Two major highways, U.S. 54 and U.S. 71, travel through Nevada. Nevada has 3M, a major employer in southwest Missouri. Both the major highways and 3M affect the demographics of the driving population in Nevada.

Agency response

It is significant that our community is located adjacent to an interstate highway with a major shopping mall, and that over half of the nonwhite stops occurred on a state highway. It is obvious that a total of three nonwhite searches (two resulting incident to arrest) cannot be statistically or otherwise significant of any factors regarding racial profiling.

Agency response

The city of Olivette has two major highways within its boundaries: I-170 is on the east and Highway 340 (Olive Blvd.) is a pipeline connecting thousands of people traveling into and through Olivette for business and pleasure. Olivette has several employers that employ hundreds of people. Over 53,000 vehicles utilize Olive Blvd. each day. Traffic enforcement along with vehicle accident investigations and other highway incidents is a majority of the police department duties. The Olivette Police Department is committed to making the streets within our boundaries as safe as possible for all people living, visiting, working or traveling through our city.

Agency response

There are two state highways that traverse most of the city. These highways link Parkville to Kansas City, Missouri and Kansas City, Kansas. The minority population of these cities are significantly greater than either the minority population of Parkville or the state average. Parkville also has a university with a large minority enrollment, most of whom are not residents, as well as several roofing and landscaping businesses that employ a large number of minorities.

Agency response

Platte City is intersected by Mo. Highway 92, which is a major transportation link for the Kansas City metropolitan area. This highway carries over 10,000 cars per day through Platte City. I-29 has two exits into Platte City. We have several large convenience stores, gas stations and fast food restaurants that bring traffic into our city from I-29. This transient traffic through Platte City will have an impact on the above data.

Agency response

The city of Richmond Heights is a 2.8 sq. mile city located on the western boundary of the city of St. Louis. I-64 (Hwy. 40) runs directly through the city, with I-170 running north from I-64. Located in the city is the Galleria shopping mall, which generates approximately 10 million visitors annually. Richmond Heights has numerous office buildings, including the 23-story University Club Towers. Richmond Heights also borders Clayton, the county seat for St. Louis County. Thousands of vehicles travel through Richmond Heights on a daily basis due to its geographic location. The RHPD was concerned about the disparate rates of searches for blacks vs. whites. An initial review of the numbers shows that 24.87% of all black motorists stopped were searched, compared to only 5.16% of the white motorists stopped. Upon further review, we found a disparate rate of outstanding warrants. (When an officer finds an outstanding warrant, the officer is required to affect an arrest and thus search the motorist as a matter of standard police policy.) It was found that 7.64% of all black motorists stopped had an outstanding warrant, accounting for 30.7% (71 of 231) of all searches of black motorists. For white motorists stopped, less than 1% (.85) had an outstanding warrant, accounting for 16.5% (15 of 91) of all searches of white motorists.

Agency response

The Shrewsbury Police Department is committed to the fair treatment of all citizens and visitors of our community. We support the Missouri Attorney General's efforts to better understand traffic enforcement activity and patterns. However, since the data in the Attorney General's report is descriptive in nature and not interpretive, further analysis of traffic stops, arrests and searches is needed so that more meaningful interpretations of the data can be made. Race-neutral explanations need to be considered and ruled out before any possible conclusions relating to disparate treatment can be drawn. Furthermore, we believe it would be more prudent to examine traffic enforcement activity in terms of the population that travels upon a community's roadways rather than its resident population. This would allow the data to then be examined in a much more appropriate context that would take into account the diversity of the surrounding region and the uniqueness of the motoring population of each individual community.

Agency response

There are unique circumstance that affect the demographics of Saint Charles City. There are two major interstate highways, I-70 and I-370, providing access from east and west. There is a major state highway, Mo. Route 94, providing access north and south through Saint Charles. The Ameristar Casino employs many individuals and has customers from the greater St. Louis metropolitan area. Criminal activity in Saint Charles City is to some degree attributable to persons who reside outside the city and who live in the greater St. Louis metropolitan area. Saint Charles City has several major shopping centers, including Bass Pro, Sam's, Wal-Mart, Lowe's, Home Depot and Target. Since the last census, there has been an influx of legal and illegal aliens into Saint Charles City.

Agency response

The percent of total persons stopped by police during 2001 (white-47.2%; black-49.4%) was fairly proportional to the number of such persons aged 16 and over residing in the City of St. Louis (white-47.6%; black-46.6%). While the reports reflect that only 6.8% of the persons stopped were searched, a disproportionate number of the persons searched were black (80.0%) as compared to whites (18.2%). One of the primary reasons for this difference is the department requirement for a search incidental to lawful arrests of persons searched. Because of this requirement, some 83% were black, as compared to 15.7% who were white. One of the major reasons for arrest was the existence of outstanding warrants (white-121; black-852). Also, the number of blacks consenting to a search (923) was greater than the number of whites (243). The rates in the 2001 report remain consistent with the rates in the 2000 report.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the city of St. Louis and therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious belief, disability or economic level. All commissioned officers have participated in cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the rights of every individual.

Agency response

The city of St. Robert is the business hub of Pulaski County and shares a common boundary with Fort Leonard Wood. Although the 2000 census data indicates a population of under 3,000 persons, it is estimated that the daytime and transient population generated by Fort Leonard Wood approaches 30,000 people.

Agency response

We have a major highway running through Sugar Creek and we have received three grants to work traffic on this highway. Those efforts have included DWI, speed, careless and reckless driving, and seatbelt enforcement. The racial makeup of the traffic on this highway is in no way reflective of the population of Sugar Creek. The Sugar Creek Police Department does not in any way participate in or endorse any type of discrimination based on race, gender or any other prohibited factor.

Agency response

Three major highways, two federal and one state, crisscross Town and Country and carry an estimated 400,000 plus vehicles through our community daily. The intersection of I-64 and I-270, located within the city, is reported to be the second or third busiest intersection in the state. Analysis shows that the overwhelming majority of the department's traffic enforcement occurs on the three referenced major highway systems, and that the city's residential population is in the minority in comparison to others traveling through, visiting, worshiping or working within its boundaries. It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City population and associated ratios than to the city of Town and Country proper. Therefore, it is our belief that the city's traffic enforcement activities are in harmony with both the provisions and intent of the state's Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within its jurisdiction.

Agency response

The campus of North Central Missouri College is located within the city limits of Trenton. The population of the college is not included in the census. This contributes to the 3.57 disparity index for the 12 stops of black motorists. U.S. Highway and state route 6 intersect in Trenton. The city of Milan, 25 miles to the east, has a large percent of Hispanic population. There is a large number of Hispanics who travel through Trenton to and from Milan.

Agency response

Urich has as part of its city limits a four-lane highway. A great deal of traffic uses Highway K as a cut through to the four-lane road from the south. I believe that the number of minority stops reflects a transient population. I would also question the reliability and accuracy of the percentages because of the low number of stops of Black drivers.

Agency response

The city of Webster Groves is part of a major metropolitan area whose population travels daily upon our streets. A major interstate highway and several north/south feeder streets are included in our traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that over 80% of traffic citations are issued to non-residents. Consequently, any statistical model wherein the resident population of the city of Webster Groves is solely used for analysis is seriously flawed.

Agency response

The following is offered as additional information to further clarify and help put the data in fuller context. Located within the city limits are six major chain hotels and two major chain car rental agencies who employ Blacks as a large percentage of their work force. Woodson Terrace is bordered to the east by the city of Berkeley, whose major population is black. Located within the city limits are two Mexican restaurants, two Mexican groceries, one Hispanic currency exchange, and an insurance brokerage firm whose primary clients and work force are Hispanic. I-70 and state highway 115 travel east and west through the city and state highway EE travels north and south, with these major routes connecting Woodson Terrace to the surrounding and outlying area. The northern city limits adjoin Lambert St. Louis International Airport, which attracts a diverse segment of the population (including Black and Hispanic) with access via I-70 and state highway 115.
